SUMMARY

Unity developer with more than 6 years of professional experience building PC games in C#, with hands-on work spanning gameplay features, animations, and **AI systems**. I bring production experience in **DOTS**, **data-oriented design**, and **multi-threaded programming**. As a team lead, I've designed systems that have stayed in production for years, which has sharpened my focus on writing clean, **maintainable code** that holds up under real-world iteration. That same lead experience has taught me how to **work with autonomy,** taking a large feature, breaking it into smaller well-scoped tasks, and driving each one through to delivery without needing close oversight.

AREAS OF EXPERTISE:

- Industrial experience in **DOTS**, **data-oriented** design approach, and **multi-thread** programming.
- Proficient in **C#**, **SOLID** methodology, and common **OOP design patterns** in game development.
- Skilled in creating tools enhance the game development process using **UI Toolkit**.
- Experienced with **Unity** engine in **PC games** as well as personal **mobile games**.
- Knowledge of shader programming using **HLSL** to modify or write simple shaders.
- Ability to **manage a development team** and project process using **agile** methodologies.
- Familiar with **Unreal Engine** and **C++.**
- Great capacity for learning and implementing new technologies and methodologies.
- Excessive analytical and data driven problem-solving skills.

CAREER HISTORY

Lead Unity Developer

Jun 2024 – Present (+2 yr.)

Williwaw Games

- Designing and implementing core gameplay features, animations, lighting systems, and other essential game elements.
- Developing and maintaining tools to optimize workflows, enhancing efficiency for design, art, and development teams.
- Assisting team members by providing guidance and support on technical tasks, ensuring high-quality outcomes and timely completion.
- Conducting thorough code reviews to uphold coding standards, improve code quality, and foster team collaboration.
- Defining development tasks, providing accurate time estimates, and planning sprint schedules to ensure effective project management and timely delivery.

- Actively contributing to the hiring process by evaluating candidates, conducting interviews, and onboarding new developers.

Lead Unity Developer
Apr 2024 – Jun 2024 (3 mos.)

Black Cube Games

- Developed a WebGL game for the Ready Player Me platform. [YouTube Link]
- Collaborated closely with design and art teams to prototype, implement, and refine game features.
- Created custom tools to streamline and enhance the art and design workflow.

Unity Developer
May 2022 – March 2024 (1 yr. 11 mos.)

Paeezan Studio

- Designed project architecture (MVP with command design pattern).
- Created a graph-based visual novel tool with **UI Toolkit** [YouTube Link].
- Created an in-game map creator tool.
- Brought git flow to the team.
- Developing gameplay features, writing shaders, and actively participating in game design decisions.
- Defining and estimating tasks, conducting **Scrum** meetings, managing tech team.

DOTS Game Developer
Apr 2021 – Oct 2021 (7 mos.)

NoOp Army

- Worked on a survival PC game using **DOTS** and Unity.
- Developed **utility AI systems** based on Curvature (Monobehaviour version: WF Utility AI).
- Implement **influence map** from scratch for DOTS (Monobehaviour version: WF Influence Map).
- Implement Unity plugins for editing and monitoring AI behaviors of entities using **UI Toolkit.**
- Added Gameplay features to the game.

Game Developer & Designer
Oct 2020 – Dec 2020 (3 mos.)

Segal Games

- Designed and developed multiple prototypes.
- Designed and Developed Hexa Dominoes [Google Play Link].
- Worked as project manager and was responsible for managing resources and deadlines.
- Managed a small multi-disciplinary team of 3 people to deliver the game based on the business plan.

Independent Game Developer
Jan 2021– Present

- Designed, developed, and published Bridge Run (game originally created for Bazaar Contest 2022 with topic of a runner game)
- Designed and developed Playground to demonstrate and test my skills in writing shaders, physic-based mechanics, rope and water simulation and etc.
- Designed and developed Rebal. A pixel art, runner, platformer game.

- Developed and published Waterfall for the final project of the "Game Design" course at University of Science and Technology.
- Participating in various game jams and contests.

Data Scientist — Jun 2019 – Mar 2021 (1 yr. 10 mos.)
TAPSI

EDUCATION

Master of Computer Science — 2018 – 2021
University of Tehran

Tehran, Iran. Major: Software Engineering

Thesis: Multi-Modal route advisory system for public transport and online taxi network, GPA 17.78/20

Bachelor of Computer Science — 2013 – 2018
Iran University of Science and Technology

Tehran, Iran. Major: Computer Engineering (AI), GPA: 16.28/20

LIFE INTERESTS

Literature: Fantasy, Science fiction

Game: MOBA, RTS, Platformer

Movies: Mystery, Anime, Science fiction

Music: Metal, Rock

Sports: Ping pong, Futsal
